

# Security Analysis & Roadmap

## Solution Overview

A holistic security analysis that produces a strategic roadmap to prioritize the steps needed to prepare your organization for the cybersecurity threats of today's digital world.

## The Details

The Katalyst Security Analysis and Roadmap is a structured, holistic review of your security infrastructure designed to arm you with the information you need to make educated, strategic decisions to prepare for today's cybersecurity threats.

Our security experts work with your team to identify and review your security architecture and technologies. We run dark web reports, execute vulnerability scans, validate best practice adherence, going from the firewall and network perimeter, down to application-level policies and protections.

Upon completion of the engagement, you receive a detailed, customized strategic roadmap, done with the mindset of "if we were in your shoes", and targeted to minimize risk, and maximize your security platforms' impact. This helps ensure you are getting the most of out of your existing investments, while prioritizing areas to improve moving forward.

Customers who have completed a SAR have a better understanding of their own environment, its strengths and weaknesses, and possess the necessary information and game plan to allocate, or in many cases, acquire, the budget needed to prepare for today's threat landscape.

## The Katalyst SAR is Right For You if You...

- Are new to the organization and want a second set of eyes to identify security risks
- Do not have dedicated security resources or CISO
- Worry that a single cybersecurity incident would be catastrophic to your organization
- Worry that a single cybersecurity incident would be catastrophic to your organization
- Have seen a competitor make headlines (the bad kind)
- Would like experienced guidance in prioritizing your security projects or budget
- Are putting trust in legacy, outdated technologies
- Have compliance requirements you aren't sure you're meeting
- Have never had a security assessment before or need a fresh perspective
- Have recovered from an incident and never want to go through that again
- Have just been informed you do not meet requirements for a partnership or cybersecurity insurance policy
