

Email Security

Protect Your Business from Email-Based Threats

Protect Your Org from Business Email Compromise

Did you know that over 75% of targeted cyberattacks begin with an email? Cybercriminals are leveraging phishing, business email compromise (BEC), and ransomware attacks to infiltrate organizations, steal sensitive data, and cause financial and reputational damage. Without robust email security, your organization is at risk.

Common Pain Points Businesses Face:

Phishing & Malware Attacks

Employees may unknowingly open malicious emails, leading to security breaches

Katalyst Solution: Advanced threat detection and blocking prevent phishing, ransomware, and malware from reaching inboxes.

Business Email Compromise

Cybercriminals impersonate executives or vendors to manipulate transactions and steal sensitive data

Katalyst Solution: AI-driven fraud detection identifies and stops BEC attempts before they cause financial harm.

Compliance Challenges

Many organizations struggle to meet GDPR, HIPAA, and other security regulations

Katalyst Solution: Our security solutions are designed to meet compliance requirements, providing audit trails and reporting features.

Operational Disruptions

Malicious email attacks can lead to downtime, data loss, and loss of customer trust

Katalyst Solution: Seamless integration with your email infrastructure ensures minimal disruption while maximizing security.

False Positives & Spam Mgmt

Organizations struggle with balancing security and email deliverability

Katalyst Solution: Machine learning technology reduces false positives, ensuring legitimate business emails aren't blocked.

“Cybersecurity is a race, a marathon you have to keep running. [Working with Katalyst] is like having a team that’s going to help you win this marathon. Instead of ‘I’m going to do my best’, we now have a plan and the right team to help us monitor it.”
