# Security Analysis & Roadmap (SAR)

Empowering Your Business with Actionable Security Strategies

## The Details

The Katalyst Security Analysis and Roadmap (SAR) is a comprehensive security assessment designed to help organizations strengthen their cybersecurity posture. This in-depth evaluation provides a clear, strategic roadmap to identify vulnerabilities, mitigate risks, and optimize security investments. By assessing your security architecture, our experts deliver actionable insights that allow you to make informed decisions in the face of evolving cyber threats.

Organizations of all sizes can benefit from SAR, particularly those looking to enhance their security readiness. Whether you are new to your role and need an independent security evaluation, have a lean IT team without dedicated security resources, or want to ensure compliance with industry standards, SAR provides critical guidance. It is also ideal for businesses that worry about cyber threats, have never undergone a security assessment, or have recently recovered from a security incident and want to prevent future breaches.

Strategic Security Roadmap			A KATAL	
Multi-Factor Authentication	Content Filtering (Web / DNI)	Implement SIEM	MDM / EDM / UEM	
Envirlferenk Acces/Grud/Sel5     Hegelod w/ Single Sign On	<ul> <li>Biolicities values</li> <li>Protest assets or / of previous</li> </ul>	Englisht Protection     Englisht Protection     NZOV / 05	<ul> <li>Register corporate devices with DoleWinds MOM</li> <li>Patch apps and create security policies.1 corporations are instructs</li> </ul>

### Key Features of the SAR

Holistic Security Review

Covers firewall, network, endpoint, and applicationlevel security.

$\bigcirc$	

Dark Web & Vulnerability Scans

Identify compromised credentials and security gaps.

#### Best Practice Validation

Ensure your organization adheres to industry-leading security frameworks.

A prioritized plan to improve your security defenses over time.

Talking to the team at Katalyst gave me a ton of confidence that they had a very established security practice. They know what they're looking at. It's not just about about running tools and giving readouts, they understand what's coming out of it and they're able to analyze and communicate about that very effectively.

## **Explore Katalyst's Services Catalog:**

Here's a quick look at the extensive list of services we provide to our clients:

#### **On-Demand Services**

- SDWAN / Routing
- Switching
- Wireless
- Firewalls
- Network Access Control
- Segmentation
- Data Center Networking
- Secure Access Service Edge (SASE)
- Endpoint Security
- Email Security
- Identity & Identity Protection
- Hybrid Cloud
- Risk Management
- Security Awareness Training

- Backup & Data Protection
- Cloud Calling
- Collaboration
- Contact Center
- Endpoint Management
- Workload Security
- Security Analytics
- Security Analysis and Roadmap
- Network Analysis and Roadmap
- Cloud Analysis and Roadmap
- Vulnerability Assessment
- Automation / Al
- Email Migrations
- Incident Response

#### **On-Going Services**

- Managed Infrastructure Services
- Managed SIEM / SOC Services
- Managed Detection and Response
- Managed Compliance Services
- Managed Help Desk Services
- Managed Microsoft Services
- Managed Data Protection Services
- Private / Public Cloud Infrastructure
- Modern Workplace Solutions
- Advisory Services

## 30%

In 2024, organizations experienced an average of 1,636 cyberattacks per week, marking a 30% increase compared to the previous year.

## About Katalyst

For over 18 years, Katalyst has helped organizations create and execute their technology vision to go further, faster. From addressing complex challenges to embracing exciting opportunities, clients trust our team's experience and expertise across cybersecurity, modern infrastructure, and cloud computing.

Take your next step forward to achieve reliable IT operations and cost efficiency through our comprehensive suite of on demand and ongoing services. Trust we will deliver on the Katalyst Guarantee: if you are not 100% satisfied with our services, we will either make it right or refund you for the last 30 days of service.

Ready to identify your organization's cybersecurity blind spots?
