

Secure Access Service Edge (SASE)

Seamless Security, Access Anywhere

Evolving Security Threats & Complex Networks

Today's workforce is more remote and hybrid than ever, accessing applications spread across multiple cloud and on-premises environments. Traditional security models struggle to keep up, leading to critical issues such as:

- **Increased Security Risks** – Legacy VPNs and firewalls are no longer sufficient against modern cyber threats.
- **Complexity & Cost Overload** – Managing multiple security tools leads to inefficiencies and inflated costs.
- **Performance Issues** – Remote users experience slow application access, impacting productivity.
- **Visibility & Control Gaps** – IT teams lack centralized visibility across their security landscape.
- **Compliance Challenges** – Struggles with regulatory requirements and securing sensitive data.

Katalyst's SASE Services

Secure Access Service Edge (SASE) combines networking and security into a single, cloud-native solution, ensuring seamless and secure access from anywhere. Katalyst's SASE offering includes:

Enhanced Security Posture

Zero-trust architecture with continuous threat monitoring.

Operational Efficiency

Consolidates multiple security solutions, reducing complexity.

Scalability & Flexibility

Easily adapts to growing business needs and hybrid workforces.

Optimized User Experience

Delivers fast, reliable access to applications and data.

Cost Savings

Reduces hardware dependency and operational overhead.

“The [Katalyst] team that I have worked with for going on 3 years is AWESOME!!! They are knowledgeable, professional and easy to work with. Katalyst has some very high-end engineers and security experts and they have made my job better by helping us with the technology we need to succeed in today's world.”

Here's a quick look at the extensive list of services we provide to our clients:

On-Demand Services

- SDWAN / Routing
- Switching
- Wireless
- Firewalls
- Network Access Control
- Segmentation
- Data Center Networking
- Secure Access Service Edge (SASE)
- Endpoint Security
- Email Security
- Identity & Identity Protection
- Hybrid Cloud
- Risk Management
- Security Awareness Training
- Backup & Data Protection
- Cloud Calling
- Collaboration
- Contact Center
- Endpoint Management
- Workload Security
- Security Analytics
- Security Analysis and Roadmap
- Network Analysis and Roadmap
- Cloud Analysis and Roadmap
- Vulnerability Assessment
- Automation / AI
- Email Migrations
- Incident Response

On-Going Services

- Managed Infrastructure Services
- Managed SIEM / SOC Services
- Managed Detection and Response
- Managed Compliance Services
- Managed Help Desk Services
- Managed Microsoft Services
- Managed Data Protection Services
- Private / Public Cloud Infrastructure
- Modern Workplace Solutions
- Advisory Services

80%

In 2025, 80% of enterprises will have adopted a strategy to unify web, cloud services, and private application access using a SASE architecture

About Katalyst

For over 18 years, Katalyst has helped organizations create and execute their technology vision to go further, faster. From addressing complex challenges to embracing exciting opportunities, clients trust our team's experience and expertise across cybersecurity, modern infrastructure, and cloud computing.

Take your next step forward to achieve reliable IT operations and cost efficiency through our comprehensive suite of on demand and ongoing services. Trust we will deliver on the Katalyst Guarantee: if you are not 100% satisfied with our services, we will either make it right or refund you for the last 30 days of service.
