

Switching

Build a Reliable, Secure, and Future-Ready Network

Overview

A modern, high-performing network starts with a secure and intelligent switching foundation. The right switching architecture ensures consistent performance, reliable connectivity, and built-in protection across every user, device, and application. Many organizations, however, still operate on legacy hardware that can't meet today's speed, visibility, and security demands.

Katalyst helps businesses refresh and modernize their wired network infrastructure using enterprise-grade technologies from Cisco Catalyst, Meraki, and Fortinet. Our engineers design, implement, and manage switching environments that deliver high performance, deep visibility, and integrated security. Each solution is tailored to your organization's size, goals, and compliance requirements—creating a future-ready network that scales as you grow.

Through our secure switching solutions, Katalyst helps your business:

- Improve reliability and performance across critical workloads
- Simplify management through automation and centralized visibility
- Strengthen security posture with built-in segmentation and policy control
- Scale seamlessly as your business and network needs evolve

Do you struggle with?

Aging or Unreliable Infrastructure

Katalyst helps refresh legacy switches with modern, cloud-managed architectures that reduce downtime and improve network stability.

Limited Network Visibility

We design switching environments with built-in analytics and monitoring so you can see what's happening across your network in real time.

Inadequate Segmentation and Security

A co-managed help desk solution that improves end-user satisfaction by 30% and gives back an average of 1 day per week for IT teams.

It feels like bought peace of mind. They worry about the things we need to worry about, identify the things we need to identify, fix the things we need to fix, and get it all done before we need to think about it.

Steven Yates, CIO MB HAYNES

Here's a quick look at the extensive list of services we provide to our clients:

On-Demand Services

- SDWAN / Routing
- Switching
- Wireless
- Firewalls
- Network Access Control
- Segmentation
- Data Center Networking
- Secure Access Service Edge (SASE)
- Endpoint Security
- Email Security
- Identity & Identity Protection
- Hybrid Cloud
- Risk Management
- Security Awareness Training
- Backup & Data Protection
- Cloud Calling
- Collaboration
- Contact Center
- Endpoint Management
- Workload Security
- Security Analytics
- Security Analysis and Roadmap
- Network Analysis and Roadmap
- Cloud Analysis and Roadmap
- Vulnerability Assessment
- Automation / AI
- Email Migrations
- Incident Response

On-Going Services

- Managed Infrastructure Services
- Managed SIEM / SOC Services
- Managed Detection and Response
- Managed Compliance Services
- Managed Help Desk Services
- Managed Microsoft Services
- Managed Data Protection Services
- Private / Public Cloud Infrastructure
- Modern Workplace Solutions
- Advisory Services

68% of IT leaders say outdated network infrastructure limits their ability to adopt new technology and secure hybrid work environments.

About Katalyst

For over 18 years, Katalyst has helped organizations create and execute their technology vision to go further, faster. From addressing complex challenges to embracing exciting opportunities, clients trust our team's experience and expertise across cybersecurity, modern infrastructure, and cloud computing.

Take your next step forward to achieve reliable IT operations and cost efficiency through our comprehensive suite of on demand and ongoing services. Trust we will deliver on the Katalyst Guarantee: if you are not 100% satisfied with our services, we will either make it right or refund you for the last 30 days of service.
