

Wireless

Deliver Reliable, Secure, and Scalable Connectivity Everywhere

Overview

Wireless networks have become the backbone of productivity, mobility, and customer experience. As organizations expand hybrid work, IoT adoption, and cloud-driven applications, traditional Wi-Fi environments often struggle to keep up. Poor coverage, congestion, and outdated security controls can impact performance and leave users vulnerable.

Katalyst helps businesses design, deploy, and manage high-performance wireless networks built on Cisco Catalyst, Meraki, and Fortinet technologies. Our solutions deliver secure, scalable, and intelligent connectivity designed to support modern workloads, enable zero-trust access, and give IT teams full visibility into network activity.

With Katalyst, your wireless environment becomes more reliable, easier to manage, and ready to support the next generation of devices and applications.

How Katalyst Can Help...

Improve Coverage and Reliability

Reduce costs, automate routine tasks, and enhance security response times by offloading day-to-day

Simplify Management and Operations

Katalyst implements cloud-managed platforms that centralize configuration, monitoring, and troubleshooting to reduce complexity for IT teams.

Increase Visibility and Performance Insight

Our solutions provide real-time analytics and health monitoring, helping you quickly identify issues, track device activity, and optimize performance.

Strengthen Security and Access Control

We integrate authentication, segmentation, and threat protection to ensure every device connection is secure

They are responsive to my needs and requests. Their engineers have the expertise to support my entire network. My IT Department has 2 employees and they understand the need for quick and efficient responses.

Here's a quick look at the extensive list of services we provide to our clients:

On-Demand Services

- SDWAN / Routing
- Switching
- Wireless
- Firewalls
- Network Access Control
- Segmentation
- Data Center Networking
- Secure Access Service Edge (SASE)
- Endpoint Security
- Email Security
- Identity & Identity Protection
- Hybrid Cloud
- Risk Management
- Security Awareness Training
- Backup & Data Protection
- Cloud Calling
- Collaboration
- Contact Center
- Endpoint Management
- Workload Security
- Security Analytics
- Security Analysis and Roadmap
- Network Analysis and Roadmap
- Cloud Analysis and Roadmap
- Vulnerability Assessment
- Automation / AI
- Email Migrations
- Incident Response

On-Going Services

- Managed Infrastructure Services
- Managed SIEM / SOC Services
- Managed Detection and Response
- Managed Compliance Services
- Managed Help Desk Services
- Managed Microsoft Services
- Managed Data Protection Services
- Private / Public Cloud Infrastructure
- Modern Workplace Solutions
- Advisory Services

74% of organizations report Wi-Fi reliability issues directly impact employee productivity and customer satisfaction.

About Katalyst

For over 18 years, Katalyst has helped organizations create and execute their technology vision to go further, faster. From addressing complex challenges to embracing exciting opportunities, clients trust our team's experience and expertise across cybersecurity, modern infrastructure, and cloud computing.

Take your next step forward to achieve reliable IT operations and cost efficiency through our comprehensive suite of on demand and ongoing services. Trust we will deliver on the Katalyst Guarantee: if you are not 100% satisfied with our services, we will either make it right or refund you for the last 30 days of service.

Is your wireless network keeping pace with how your business connects today?
