

Protect your organization from business email compromise

Protect Your Business from Email-Based Threats

Over 75% of targeted cyberattacks begin with an email. Cybercriminals use phishing, business email compromise, and ransomware to infiltrate organizations, steal data, and cause financial and reputational damage.

Without robust email security, your organization is at risk.

“

Cybersecurity is a race, a marathon you have to keep running. [Working with Katalyst] is like having a team that's going to help you win this marathon. Instead of 'I'm going to do my best', we now have a plan and the right team to help us monitor it.”

COMMON PAIN POINTS BUSINESSES FACE

Phishing & Malware Attacks

Employees may unknowingly open malicious emails.

Katalyst: Advanced threat detection blocks phishing, ransomware, and malware before inboxes.

Operational Disruptions

Email attacks lead to downtime, data loss, and lost customer trust.

Katalyst: Seamless integration with your email infrastructure minimizes disruption.

Business Email Compromise

Criminals impersonate executives or vendors to manipulate transactions.

Katalyst: AI-driven fraud detection stops BEC attempts before they cause financial harm.

False Positives & Spam Management

Balancing security with deliverability is hard.

Katalyst: Machine learning reduces false positives so legitimate business email isn't blocked.

Compliance Challenges

Many organizations struggle to meet GDPR, HIPAA, and other regulations.

Katalyst: Our solutions meet compliance requirements with audit trails and reporting.

91% of cyberattacks begin with a phishing email

The Katalyst Guarantee

If you are not 100% satisfied with our services, we will either make it right or refund you for the last 30 days of service.

Don't wait until a cyberattack disrupts your business.
