

Cloud Advisory Services

Expert guidance on cloud strategy, architecture, and cost across Azure and AWS. Make confident cloud decisions without hiring a full-time cloud architect.

THE CHALLENGE

Rising, unexplained cloud cost

Spend grows and no one can confidently say why or how to fix it.

Architecture uncertainty

Big decisions about where and how to run workloads keep getting deferred.

No neutral advisor

Guidance comes from whoever is selling, not from your best interest.

Katalyst is an accelerator to my team. I do not have to staff every new skill set internally. I can rely on Katalyst to advise and execute when needed.

VP AND CHIEF INFORMATION OFFICER • THE AZEK COMPANY

WHAT'S INCLUDED

Confident cloud decisions, guided

- **Cloud strategy.** Where workloads belong and how to get the most from Azure and AWS.
- **Architecture guidance.** Design decisions for performance, resiliency, and security.
- **Cost optimization.** Right-sizing and governance to control and predict spend.
- **Roadmap ownership.** A prioritized plan someone actually drives forward.

A named senior resource sets the direction, and **our engineers can execute it.**

THE OUTCOME

Controlled cost

Visibility and governance over cloud spend.

Sound architecture

Decisions grounded in your goals, not a sales pitch.

Faster progress

A roadmap with a senior owner behind it.

Lower cost of expertise

Architect-level guidance without the headcount.
