

Migrations

Cloud, Microsoft 365, servers, identity, and offices, moved without the downtime, data loss, and cost overruns that sink most migrations. We plan in phases, validate at every checkpoint, and cut over cleanly.

THE CHALLENGE

Downtime during cutover

Poorly sequenced moves take systems offline during business hours, and the impact lands on customers and staff alike.

Data loss and surprises

Without validation at each step, files, mail, and permissions go missing, and no one notices until it matters.

Budgets that run over

Under-scoped projects hit hidden dependencies mid-flight, and costs climb while the timeline slips.

70%

of IT projects exceed budget or timeline

WHAT WE MIGRATE

The moves that carry the most risk

- **Cloud migrations.** Moves to Microsoft 365 and Azure, including hybrid setups, planned and validated so nothing is lost and users barely notice the change.
- **Server and data center.** Server, storage, and data center migrations and consolidations, sequenced to protect uptime and validated before any cutover is final.
- **Identity and email.** Active Directory, Entra ID, and email or collaboration migrations, with accounts, groups, permissions, and mail moved cleanly and verified.
- **Office relocations.** Office moves and consolidations, from network and connectivity to workstations and phones, coordinated so day one just works.

Every migration includes **phased planning, data validation, and documented rollback**, delivered by U.S.-based engineers.

WHAT WE MOVE

Microsoft 365

Azure

Servers & Storage

Data Center

Active Directory / Entra ID

Office Relocations

THE OUTCOME

Minimal disruption

Off-hours cutovers and phasing keep the business running throughout.

No data loss

Integrity validated at every checkpoint, with rollback ready if needed.

On time, on budget

Clear scope and milestones that hold, without mid-project surprises.

Ready for what's next

A clean foundation you can operate and build on, with support after go-live.

HOW WE DELIVER IT

PLAN

Discovery & Scope

EXECUTE

Phased Migration

DELIVER

Validate & Support

Plan your migration the right way.

Tell us what you are moving and we will scope a phased plan that protects uptime and your data.
