

Security Awareness Training

Your people are the most targeted part of your Digital Backbone. We turn them into a working control with ongoing training, realistic phishing simulations, and measurable improvement that satisfies auditors and insurers alike.

THE CHALLENGE

Phishing is the front door

Convincing emails, fake login pages, and social engineering remain the top way attackers get in, no matter how good your tools are.

Once-a-year training does not stick

A single annual module is forgotten in weeks. Behavior only changes with ongoing reinforcement and realistic practice.

You cannot prove it worked

Insurers and frameworks now require documented, measurable training, and a slide deck viewed once does not count.

95%

of breaches involve human error

Up to 75%

reduction in phishing click rates with ongoing training

43%

of U.S. small businesses have already been attacked

Baseline

training is now a cyber insurance requirement

WHAT'S INCLUDED

A program that changes behavior

- **Realistic phishing simulations.** Safe, realistic simulated attacks mirror what your people actually face, and every click becomes a coaching moment instead of a breach.
- **Ongoing interactive training.** Short modules on a regular cadence cover phishing, passwords, social engineering, and the compliance topics your industry requires.
- **Reporting and measurement.** Clear dashboards track click rates, completion, and improvement, so you can show leadership the trend.
- **Compliance-ready evidence.** Every campaign produces the documentation auditors and cyber insurers ask for, captured automatically.

Delivered and managed by Katalyst, so the program actually runs month after month instead of **stalling after launch**.

WHAT IT COVERS

Phishing

Passwords

Social Engineering

Compliance Topics

Reporting & Metrics

Insurer Requirements

THE OUTCOME

Fewer risky clicks

Measurable, sustained drops in phishing click rates.

A security-first culture

People who spot and report threats instead of falling for them.

Insurance and audit ready

Documented, measurable training that meets insurer and framework requirements.

Improvement you can see

Reporting that shows risk dropping quarter over quarter.

HOW WE DELIVER IT

ASSESS

Baseline & Simulation

TRANSFORM

Training Rollout

MANAGE

Measure & Report

Turn your team into a line of defense.

We will baseline your current risk, run a simulation, and show you how quickly training moves the numbers.
